

*Compressed fit bolted and stress-free design.  
Reliable under the most arduous operating conditions.  
The heavy-weight performers.*

## **Grizzly Vibratory Feeders Type FGU / FGD**

**SKAKO**®  
**comessa**

1.  
**SOCOMAN - FGD160/0450M1H**  
 Rocks - 1000 mm  
 Capacity 400 t/h  
 Cutting 150 mm

2.  
**NOVACARB - FGD160/0800M1H**  
 Limestone - 1500 mm  
 Capacity 800 t/h  
 Cutting 200 mm

3.  
**FLS-FORTUNE - FGD200/0500M1H**  
 Scalping - 1000 mm  
 Capacity 1200 t/h  
 Cutting 70 mm

4.  
 Exciter generating linear vibration

5.  
 Stone of up to 1,5 m is handled on standard equipment

## SKAKO COMESSA heavy duty Grizzly Feeders for Feeding and Pre-Screening - Two Machines in One

A feeding deck situated directly under the dump hopper and followed by a sectionally replaceable, efficient screening area.

The feeding deck is capable of withstanding both the imposed material and dynamic loading from a fall height of up to 10 metres, depending on rock size.

The screening area is designed as a sectionally replaceable cascade screen with tapered opening for self cleaning and efficient extraction of undersize material. Standard nominal aperture from 30 to 500 mm.

High vibrating acceleration figures allow even dirty or sticky products to be handled efficiently.

With over 50 years of experience in the design and manufacture of heavy duty feeders and feeder grizzlies, and with innumerable units operating world-wide, SKAKO COMESSA Grizzly Feeders have proved themselves.
